

STEAM CLEANING SERVICE WITH UV-C RAYS

Kill Bacteria & Germs with UV-C RAYS STEAMER

Our Steam Machine uses the patented **Blue Evolution** Technology that encompass both Steam & Vacuum functionalities with UV-C rays to sterilize the air and surfaces. **The Steam and vacuum combined, will dry and absorb the germs & bacteria.** This machine has the ability to reach every surface & disinfect bacteria, fungi viruses. It uses a water filter vacuum system which is a natural barrier to block all the dirt into the water and not spread into the air. The UV light kills germs up to 99.9%.

Benefit :

1. Reduce bacteria / germs in the output air
2. Reduce bacteria / germs in the disposal water so it is possible to drop the water of vacuum tank into the toilet or dirt water tube

CONTACT US NOW!

Green cleaning, along with dry vapor steam, the BlueEvolution systems remove 99.9% of all germs on surfaces. A built-in water filter UVC light further reduces the germs extracted from the surface for bacteria-free waste disposal. This makes the BlueEvolution steam vac the cleaner solution for HACCP-certified and is certified by the USA NSF for sanitation in the food industry.
